**ATTENTION PROPERTY OWNER: WE WOULD LIKE TO DO A FREE ROOF AND  
PROPERTY INSPECTION FOR YOU!**

In our ongoing company tradition of maintaining top quality customer care for our property owners as well as their tenants, Americanstruction would like to let you know that we have been performing work to repair hail damage to the roofs and other exterior items on several properties in your area. This is the result of the severe storms that dropped ½" (large marble) to 1" (golf ball) and larger hail throughout the Palos Heights area on May 27th, 2019. At Americanstruction we have insurance industry experts on staff who are able to professionally prepare and deliver damage reports and estimates to your insurance company. We will also meet with your insurance company at your property to show them the damage in person and to agree on a fair price to perform the necessary repairs. Once the damage is agreed to and funded by the insurance company our project managers will quickly order the materials and assign the crews necessary to properly complete the work and leave you with a finished project. This approach ensures that you, as our client, are able to properly restore your property after a loss with a minimum amount of time and effort, and without cost overruns.

Americanstruction understands that commercial roofing systems are critical for protecting the investment of its clients. To ensure that properties are well protected from the elements, we offer extensive commercial roofing systems. Our expertise extends from Industrial Buildings and Apartment Complexes to Office Buildings.

**Please call TODAY to schedule your FREE inspection! Office (815) 469-4960**
